## PROFILE

I am a hard working and energetic developer with a passion for computer science. I have an ability to absorb and learn different programming languages and quickly understand different codebases and documentation. I am currently in my second year of my degree in Computer Science and I am looking for part time or full time work to compliment my studies.

## PROJECTS

### **DarkUx (formerly known as LofiAt)**

<https://lofiat.github.io>

- I created a study space service to run on laptops, tablets and other larger devices
- I wrote all of the code using the following technologies: HTML, CSS and JavaScript.
- I worked using the Google api as well as that of YouTube.

### **Developer Portfolio**

<https://adriantd.com>

- I built a personal portfolio to display all of my projects as well as my experience as a developer.

### **Personal portfolio**

<https://adriantobi.github.io>

- I created a simple portfolio website that I use for my photography services.
- It also made this using HTML, CSS and JavaScript.

### **REPAT**

- I helped a paediatrician to create an online tool for patient diagnosis.
- This was one of the most challenging projects I had made, it was the first time I handled any back-end.

## AWARDS

17/03/2023

### **EECS Lab Support System: Design Competition,**

*School of Electronics Engineering and Computer Science (QMUL)*

The design competition was looking for new ways to support labs both technically and non-technically to improve student and staff experience.

30/11/2022

### **Duke of Edinburgh's Gold Award**

My DofE skill was building the study space website, DarkUx. It helped me develop my research skills as I learnt to utilise different sources of research, from documentation to the use of how to guides and even interactive articles. Through working with these different sources I have learnt to distinguish relevant information in order to solve problems much quicker. I received my Gold Award on the grounds of the Buckingham Palace.
